

**ARCHITECTURAL CONTROL GUIDELINES AND REGULATIONS
OF
LONGMIRE ON LAKE CONROE OWNER'S ASSOCIATION**

WHEREAS, the property affected by these Architectural Control Guidelines and Regulations is subject to certain dedications, covenants and restrictions (the "Declaration") set out in instruments recorded in the Official Public Records of Real Property at Montgomery County, Texas as follows:

- *Section One* – Clerk's File No. 9546016;
- *Section Two* – Clerk's File No. 9603593;
- *Section Three* – Clerk's File No. 9647466; and
- *Amendment regarding Sections I and II* – Clerk's File No. 9766425; and

WHEREAS, pursuant to the authority vested in Longmire on Lake Conroe Owner's Association (the "Association") in the Declaration and as required by the TEXAS PROPERTY CODE, the Board of Directors of the Association (the "Board") and the Architectural Control Committee (the "ACC") have determined that, in order to provide clear and definitive guidance for maintaining the aesthetics and architectural harmony of the community, it is appropriate to adopt guidelines toward that end. Therefore, the Board and the ACC hereby promulgate the following Architectural Control Guidelines and Regulations.

NOW, THEREFORE, BE IT RESOLVED that the following conditions and requirements are hereby established for Association Architectural Control Guidelines and Regulations:

GUIDELINES AND REGULATIONS

The following are guidelines adopted by the Board and the ACC to specify their standards, requirements and thought process used in evaluating various exterior improvements. These guidelines may be amended from time-to-time as circumstances, conditions or opinions of the Board and ACC dictate. The ACC has the right to deny approval for a similar improvement based on the proximity of a property to a main boulevard or the visual relativity of the site to the overall development. As an example, a home located on the perimeter of the development may be permitted to have a certain styled storage building, whereas on a main entry boulevard and depending on the configuration of the lot, this same item may not be approved. The intent being to maintain overall integrity within areas of higher visual impact.

It should be noted that the ACC approval is required prior to the installation or construction of the improvement or change. If an improvement is made without ACC approval, the Board of Directors has the legal right to enforce its removal.

The following guidelines shall be applicable to all properties under the jurisdiction of the Longmire on Lake Conroe Owner's Association (the "Association").

These guidelines shall also encumber any future property which may be brought within the jurisdiction of the Association.

These guidelines supercede and take the place of any previous architectural control guidelines for the Association.

A. RAINWATER RECOVERY SYSTEMS:

1. Rainwater Recovery Systems may be installed with advance written approval of the ACC subject to these guidelines.
2. All such Systems must be installed on land owned by the property owner. No portion of the Systems may encroach on adjacent properties or common areas.
3. Other than gutters and downspouts conventionally attached to a dwelling or appurtenant structure, all components of the Systems, such as tanks, barrels, filters, pumps, motors, pressure tanks, pipes and hoses, must be substantially screened from public view from any street or common area. Screening may be accomplished by:
 - a. placement behind a solid fence, a structure or vegetation; or
 - b. by burying the tanks or barrels; or
 - c. by placing equipment in an outbuilding otherwise approved by the ACC.
4. A rain barrel may be placed in a location visible from public view from any street or common area only if the configuration of the guttering system on the structure precludes screening as described above with the following restrictions:
 - a. the barrel must not exceed 55 gallons; and
 - b. the barrel must be installed in close proximity to the structure on a level base with the guttering downspout leading directly to the barrel inlet at a substantially vertical angle; and
 - c. the barrel must be fully painted in a single color to blend with the adjacent home or vegetation; and
 - d. any hose attached to the barrel discharge must be neatly coiled and stored behind or beside the rain barrel in the least visible position when not in use.
5. Overflow lines from the Systems must not be directed onto or adversely affect adjacent properties or common areas.

6. Inlets, ports, vents and other openings must be sealed or protected with mesh to prevent children, animals and debris from entering the barrels, tanks or other storage devices. Open top storage containers are not allowed, however, where space allows and where appropriate, ACC approved ponds may be used for water storage.
7. Harvested water must be used and not allowed to become stagnant or a threat to health.
8. All Systems must be maintained in good repair. Unused Systems should be drained and disconnected from the gutters. Any unused Systems in public view must be removed from public view from any street or common area.

B. DISPLAY OF RELIGIOUS ITEMS:

1. A property owner or resident may display or attach one or more religious items to each or any entry to their dwelling. Such items may include any thing related to any faith that is motivated by the resident's sincere religious belief or tradition.
2. Individually or in combination with each other, the items at any entry may not exceed 25 square inches total in size.
3. The items may only be displayed on or attached to the entry door or frame and may not extend beyond the outside edge of the door frame.
4. To the extent allowed by the Texas state constitution and the United States constitution, any such displayed or affixed religious items may not:
 - a. threaten public health or safety; or
 - b. violate any law; or
 - c. contain language, graphics or any display that is patently offensive to a passerby.
5. Approval from the ACC is not required for displaying religious items in compliance with these guidelines.
6. As provided by Section 202.018 of the TEXAS PROPERTY CODE, the Association may remove any items displayed in violation of these guidelines.

C. ROOFING MATERIALS:

1. All buildings shall be roofed with composition shingles unless otherwise approved in writing by the ACC. Wood shingles are specifically prohibited for safety reasons.

2. Composition shingles must weigh at least 230 pounds per square and have a stated warranty of at least 25 years. Shingles must have a laminated design. Three-tab shingles are specifically prohibited except for use as a starter and cap rows.
3. Roof shingles must be dark brown or dark gray tones. Light brown, light gray, blue, green, red and white colors are not allowed.
4. Roof overlays are not allowed. Prior to roofing, all existing materials must be removed down to clean decking. Any damaged or deteriorated decking must be replaced.
5. Ridge vent are encouraged, to improve ventilation, reduce attic temperature and reduce cooling costs, but are not required.
6. All roof protrusions, such as vents, roof jacks, must be painted to match the shingles.
7. Subject to Section 8 below and with advance written approval from the ACC, an owner may install shingles (“Alternative Shingles”) which are designed primarily to:
 - a. be wind and hail resistant; or
 - b. provide heating or cooling efficiencies greater than traditional composition shingles; or
 - c. provide solar energy capture capabilities.
8. Once installed, any such Alternative Shingles must:
 - a. resemble the shingles used or authorized to be used on other structures within the Association; and
 - b. be more durable than and of equal or superior quality to the shingles used or authorized to be used on other structures within the Association; and
 - c. match the aesthetics of properties surrounding the owner’s property.

D. SOLAR ENERGY DEVICES:

1. These guidelines apply to solar energy devices (“Devices”) as defined in Section 171.107(a) of the Texas Tax Code. A solar energy device means a system or series of mechanisms designed primarily to provide heating or cooling or to produce electrical or mechanical power by collecting and transferring solar-generated energy. The term includes a mechanical or chemical device that has the ability to store solar-generated energy for use in heating or cooling or in the production of power.

2. Such Devices may only be installed with advance written approval of the ACC subject to these guidelines.
3. Any such Device must be installed on land or structures owned by the property owner. No portion of the Devices may encroach on adjacent properties or common areas.
4. Such Devices may only be installed in the following locations:
 - a. on the roof of the main residential dwelling; or
 - b. on the roof of any other approved structure; or
 - c. within a fenced yard or patio.
5. For Devices mounted on a roof, the Device must:
 - a. have no portion of the Device higher than the roof section to which it is attached; and
 - b. have no portion of the Device extend beyond the perimeter boundary of the roof section to which it is attached; and
 - c. conform to the slope of the roof; and
 - d. be aligned so the top edge of the Device is parallel to the roof ridge line for the roof section to which it is attached; and
 - e. have a frame, brackets and visible piping or wiring that is a color to match the roof shingles or a silver, bronze or black tone commonly available in the marketplace; and
 - f. be located in a position on the roof which is least visible from any street or common area, so long as such location does not reduce estimated annual energy production more than 10% over alternative roof locations (as determined by a publically available modeling tool provided by the National Renewable Energy Laboratory [www.nrel.gov] or equivalent entity).
6. For Devices located in a fenced yard or patio, no portion of the Device may extend above the top of the fence. If the fence is not a solid fence which blocks view of the Device, the Association may require the Device be placed in a location behind a structure or otherwise require visual screening. The Association may consider installation of Devices on properties without a fenced yard if there is adequate screening from public view from any street or common area.
7. All Devices must be installed in compliance with manufacturer's instruction and in a manner which does not void material warranties. Licensed craftsmen must be used where required by law. Permits must be obtained where required by law.

8. Installed Devices may not:
- a. threaten public health or safety; or
 - b. violate any law; or
 - c. substantially interfere with the use and enjoyment of land by causing unreasonable discomfort or annoyance to any adjoining property owner.
9. All Devices must be maintained in good repair. Unused or inoperable Devices must be removed.

This is to certify that the foregoing Architectural Control Guidelines and Regulations was adopted by the Board of Directors, effective as of December 29, 2011, until such date as it may be modified, rescinded or revoked.

The Board of Directors hereby approves and authorizes the above Policy.

Signed this 29 day of December, 2011.
